

MISSION

Assist those facing unintended pregnancies with medical services, education and resources in a caring and confidential environment.

VISION

Upholding the Value of Every Human Life.

2025 IMPACT

• **Extended clinic hours**

We increased our clinic hours at all five clinics to better serve patients and meet community needs.

• **Empowered with the truth**

Women and couples facing difficult pregnancy decisions deserve clear, accurate information. When provided with ultrasounds and compassionate care at CAPS, the vast majority chose a life-affirming path.

• **Equipped future families**

Parenting classes and educational resources, in-person and online, gave both single parents and couples the skills and confidence to care for their infants and children.

• **Expanded public relations**

We reached more faith-based media outlets and were also featured in secular publications and online platforms. These efforts helped share the good work of CAPS and pregnancy clinics in general. We also increased our presence at community and health fairs.

• **Engaged in strategic planning**

Continuous improvement is central to CAPS' culture. Leadership focused on investing in the future with plans to strengthen communication channels where patients are seeking help 24/7. With the support of our partners, 2026 will bring improved ways for potential patients to connect with us.

2025 STATISTICS

 **2,430**
total pregnancy visits.

 **1,426**
positive pregnancy tests.

 **153**
STD/STI tests performed.

 **1,770**
ultrasounds performed.

 **413**
prayer/Gospel presentations.

 **137**
social services participants.
